

Input data

MRI scan

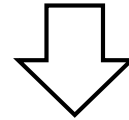

DL models:

M_1 ,
 M_2 ,
 M_3 ,
 M_4 ,
 M_5 ,
 M_6

Processing

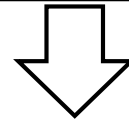

Step 1. Localization

- 1.1. Get LV area by M_1
- 1.2. Get RV area by M_2
- 1.3. Get Myo area by M_3

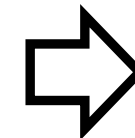

Step 2. Mask generation

- 2.1. Get LV mask by M_4
- 2.2. Get RV mask by M_5
- 2.3. Get Myo mask by M_6

Step 3. Postprocessing

- 3.1. Smooth masks by Gaussian blur
- 3.2. Combine all masks to single mask
- 3.3. Map combined mask to match original image size

Output data

Segmentation mask
