

Input data

Images

Cascade of classifiers:

M_7 ,
 M_8 ,
 M_9 ,
 M_{10}

Processing

Step 1. Preparation

- 1.1. Resize images
- 1.2. Segmentate images (find masks)
- 1.3. Combining images and masks data
- 1.4. Images and masks augmentation
- 1.5. Combine end-systole and -diastole

Step 2. Classification

- 2.1. Classification by model M_7
- 2.2. If model M_7 result = a
classification by model M_8
- 2.3. If model M_7 result = b
classification by model M_9
- 2.4. If model M_9 result = a
classification by model M_{10}

Output data

One of pathologies:

ARV,
HCM
MINF,
DCM,
NOR
